Average indirects	1,460	1,503	-3%	
Ratio direct / Indirect	6.2	6.5		

^a -19 % at constant currencies

^b 6 % at constant currencies

To reflect the diversification in our global infrastructure the division “Energy” has been renamed “Global Business”.

The revenue decline in Q1 in our divisions Global Business and The Netherlands was partly offset by growth in Germany. The gross margin improved due to a change in the mix, helped by additional working days in Europe. Operating costs increased due to further investments in our organisation in Europe, partly offset by savings in our Global Business.

In Q1, our **Global Business** division achieved a slightly lower than expected further decline in headcount. Revenue decreased by 18% compared to Q4 2016. The gross margin increased from 10.9% to 11.6%. Operating costs decreased by 7%.

Revenue in **Europe** continued to grow year on year, driven by strong performance in Germany.

The Netherlands faced a slow start of the year, in combination with the continued impact of the reduction in number of freelancers during 2016. Q1 2017 included two additional working days compared to Q1 2016. Revenue per working day decreased by 14%, and the gross margin adjusted for working days is 27.8%. A higher bench and higher illness caused the decrease in gross margin.

Germany continues to grow, helped by three additional working days in Q1. Revenue per working day increased by 8% and the gross margin adjusted for working days remained stable at 34.1%. A lower bench offset more vacation and illness.

Outlook

Given the current market circumstances in Global Business, it remains difficult to provide an outlook for the rest of the year. Germany will continue to grow, while The Netherlands will return to growth in the second half of the year.

Jan Arie van Barneveld, CEO of Brunel International N.V.: *"I'm optimistic that after a challenging first half year our results will start improving. The developments in our Global Business suggest we will see the trough somewhere in the middle of this year. With The Netherlands exceeding last year's headcount somewhere in Q2, all divisions will contribute to the improvement of our results."*

9 June 2017	Dividend available for payment
18 August 2017	Half Year 2017 results
3 November 2017	Trading update Q3 2017

Certain statements in this document concern prognoses about the future financial condition and the results of operations of Brunel International N.V. as well as plans and objectives. Obviously, such prognoses involve risks and a degree of uncertainty since they concern future events and depend on circumstances that will apply then. Many factors may contribute to the actual results and developments differing from the prognoses made in this document. These factors include general economic conditions, a shortage on the job market, changes in the demand for (flexible) personnel, changes in employment legislation, future currency and interest fluctuations, future takeovers, acquisitions and disposals and the rate of technological developments. These prognoses therefore apply only on the date on which the document was compiled.
